

CO2 . Assessment . Tool - 3

name: u. kushwaha

Reg no: 192424150

course: computer vision with opencv

code: DS0205

⑪ Image contains high-frequency noise.

- Allows low-frequency components to pass
- Blocks high-frequency noise.
- Removes unwanted noise from the image.

⑫ Preserve low-frequency components while removing noise.

- Passes low frequencies smoothly.
- Gradually attenuates high frequencies.
- Preserve important image information.

⑬ Edge enhancement in frequency domain.

- Removes low-frequency components.
- Preserves high-frequency details like edges.
- Enhance edges and fine details.
- Sharpens the image.

⑭ smooth version of an image.

→ removes high-frequency components.

→ keep low-frequency information.

Result:

→ image becomes smooth.

→ noise decreases.

⑮ An object is clearly brighter than the background. Explain and justify the segmentation technique.

→ select a threshold value.

→ Pixels above threshold → object.

→

→ Pixels below threshold → Background.

→ works well when object is much brighter.

⑯ separate foreground and background based on intensity.

→ Choose one threshold.

→ Foreground intensity $\geq$ threshold.

1. The first part of the report is devoted to a general survey of the situation in the country.

2. The second part of the report is devoted to a detailed analysis of the economic situation.

3. The third part of the report is devoted to a detailed analysis of the social situation.

4. The fourth part of the report is devoted to a detailed analysis of the political situation.

5. The fifth part of the report is devoted to a detailed analysis of the cultural situation.

6. The sixth part of the report is devoted to a detailed analysis of the scientific situation.

7. The seventh part of the report is devoted to a detailed analysis of the sports situation.

8. The eighth part of the report is devoted to a detailed analysis of the health situation.

9. The ninth part of the report is devoted to a detailed analysis of the environment situation.

10. The tenth part of the report is devoted to a detailed analysis of the international situation.

11. The eleventh part of the report is devoted to a detailed analysis of the future prospects.

12. The twelfth part of the report is devoted to a detailed analysis of the conclusions.

13. The thirteenth part of the report is devoted to a detailed analysis of the recommendations.

14. The fourteenth part of the report is devoted to a detailed analysis of the annexes.

15. The fifteenth part of the report is devoted to a detailed analysis of the bibliography.

(A) $\rightarrow$ dilation connects broken edges

$\rightarrow$ Erosion restores object shape

$\rightarrow$ Improves edge continuity.

$\rightarrow$ Removes small gaps.

(20) you need to extract object outlines from an image. describe and apply an appropriate technique.

(A) $\rightarrow$ perform erosion

$\rightarrow$ subtract eroded image from original image.

Formula: $\text{Boundary} = \text{original image} - \text{Eroded image}$

$\rightarrow$ clearly identifies object boundaries.
